## Facts

- The existing Lucky Plaza shopping center was built in the late 1970s. A comprehensive face-lift of the 7-story podium was undertaken both to satisfy the energy conservation requirements, and to update the shopping center's image.
- Fluorocarbon and aluminum is used throughout the 100 meter main facade.
- Pilasters articulate the facade while flood lighting, and the six lanterns at the wall head are used for special effect.
- A continuous canopy shelters shoppers from the elements; over the entrance it transforms into a concave port cochere.
