Years and costs

Year (construction start)	2007	Year (construction end)	2012
----------------------------------	------	--------------------------------	------

Facts

- The north facade is matt black to help it absorb as much solar radiation as possible during the short time it is exposed to the sun.
- The tower's facade is bright white on the south, west and east elevations in order to reduce solar gain due to exposure to the sun.
- A vertical garden featuring palm trees and vegetation rises through the interior between the two halves of the building.
- There is a terrace on the hotel roof, also with palm trees.
- The glass of the facade is screenprinted with a palm frond motif, echoing the palm trees inside the building.
- The building is conceived so as to make use of natural light during the day, also adding to energy efficiency.
- The architects' stated intent was to achieve a "living element in permanent transformation" through the ever-changing interplay of light and shade inside the building and the fusing of design and nature.
- Behind the glass curtain wall and insulation, there is a concrete panel: this layering improves thermal inertia and contributes to the building's energy efficiency.
- A panoramic restaurant occupies a gallery joining the two halves of the building on the 14th floor.

Get Emporis Research today and benefit from our worldwide database now!

Analyze buildings, construction markets, regions and competitors

- 450,000 buildings from a wide range of categories such as residential, office, retail, hospitality and many more
- Choose from a broad range of regional data packages – or create your own
- Powerful and fast search for in-depth analysis
- Detailed search queries in over 50 data fields, e.g. filter by location, size, status, building usage and construction types
- Generate customized lists of construction projects and involved companies

Generate leads and explore new business opportunities

- Get contact information for over 160,000 companies
- Search for companies related to specific construction projects or generate lists according to particular fields of activity
- Find new clients and business partners or connect with key players in new markets
- Forecast trends and future market growth
- Spend less time researching, and more time doing business

Keep up to date and ahead of your competitors

- Get constantly-reviewed data from around the globe
- 24/7 access to the database from anywhere in the world
- View detailed information about existing buildings as well as those planned and under construction
- Save your searches for easy future reference
- Receive email notifications about new content fitting your criteria

Download data and put it to work

- Export information easily to CSV/Excel files
- Individually select data fields for your specific needs
- Integrate the data into your own internal system
- Provide your staff with actionable data
- Benefit from limitless downloads within your chosen package
